Chris Moulton, M.S. Computer Science

Senior Software Engineer @ ASRC Federal
Clementon, New Jersey, United States

Summary

I am passionate about continuously learning and adapting to achieve both personal and organizational goals.

Please feel free to explore my profile to learn more about me and my journey!

Experience

ASRC Federal
4 years 1 month

Senior Software Engineer
March 2026 - Present (8 months)

Software Test Automation Engineer
October 2022 - March 2026 (3 years 6 months)

Responsibilities: Software Development, Software Testing, Software Integration

Please reach out for more details!

Freedom Mortgage

Product Delivery Engineer
July 2021 - June 2022 (1 year)

Responsibilities: Database Administration, Data Analysis, UAT

Following graduation, I was chosen for Freedom's "First Flyer" program, an accelerated learning initiative designed for recent college graduates. Throughout this program, I participated in rotational assignments aimed at gaining comprehensive insight into both the company's IT department and the broader mortgage industry.

During these rotations, I utilized SQL to query loan and customer data from Oracle DB, conducted testing on mortgage processing software, and took on responsibilities for creating, developing, and maintaining reports using Jira and Tableau.

Moreover, this role served as my introduction to the Agile SCRUM development methodology, further expanding my skill set and understanding of industry best practices.

Freedom Mortgage
Information Security Intern
June 2019 - August 2019 (3 months)
Moorestown, New Jersey

Responsibilities: Network Management, Application Security

During my second internship at Freedom Mortgage, I had the pleasure of working with the Information Security Team. In this role, my responsibilities included monitoring company traffic using QRadar and Palo Alto, scanning for phishing emails and malicious links, and configuring firewall rules and conditions. Additionally, I compiled and presented weekly reports highlighting significant changes in security data. This experience enhanced my understanding of information security practices and refined my skills in threat detection, data analysis, and presenting!

RYLTY
Owner
August 2017 - August 2018 (1 year 1 month)

Right before my Sophomore year of college, I decided to try and create my own brand from my dorm room, called "RYLTY". (Pronounced Royalty)

At first, RYLTY only sold apparel, but later branched out to support jewelry and other accessories. Later in the year we weeded out the apparel and focused on just jewelry. This is when some networking started and with some collaboration with international manufacturers, RYLTY was able to provide custom jewelry using authentic materials. We were able to provide authentic Gold, White Gold, 925 Sterling Silver, Platinum, and GIA Certified Diamonds (Clarity of SI-VVS).

RYLTY really opened my eyes in terms of what's possible, and the value of not only the internet, but social media in general. This first attempt sparked an untapped passion for entrepreneurship within myself!

Freedom Mortgage
IT Analyst
June 2017 - August 2017 (3 months)
Cherry Hill, NJ

During my very first internship, I gained pivotal insights into the realm of IT.

Tasked with managing and analyzing mortgage loan data, this role helped hone my analytical skills by presenting findings to management using Tableau and PowerPoint. Collaborating with colleagues, I played a key role in identifying and depicting significant data trends, which contributed to informed decision-making processes. This internship provided a valuable opportunity to develop my knowledge in industry-standard tools and techniques, setting a solid foundation for my future endeavors in the field!
